

Chair & Table glides and adjustable feet

Everyone wants to make sure that their furniture and flooring lasts for as long as possible so we recommend that wherever possible clients should choose the correct glide for chairs, stools and tables. Here are our suggestions:

FELT GLIDES

For wooden floors and some tiled floors. These glides will also provide some noise reduction.

NYLON GLIDES

For stone, tiled and carpeted floors

NYLON/ FELT ADJUSTABLE FEET

We recommend either nylon or felt adjustable feet for pedestal tables so that any uneven surfaces may be levelled out.
